#### Introduction

#### **Purpose**

The purpose of this document is to describe the requirement specification for the web site "Making the world a Better Place".

The intended audience for this document is two fold. First it is the contract between you and the client and the developer of the site. Two primary goals are:

- 1. Client gets a very good understanding of what you will be delivering.
- 2. Developer has a very good understanding of what they are going to create.

The web site to be created is an informative site designed to be provide users with information on ways that they can help to make the world a better place. I believe that working to improve always begins with yourself. The collective whole of each individual can really make a difference.

#### Definitions, acronyms, and abbreviations

HTML – Hypertext markup language – used to define your content.

PHP – Personal Home Page – language that helps to customize html.

CSS – Cascading Style Sheets – used to define the look of a web site.

W3 Validation – refers to both Html and CSS validation tool provided by the

W3c.org. the html validator is located at:

http://validator.w3.org/

with the CSS validator located at:

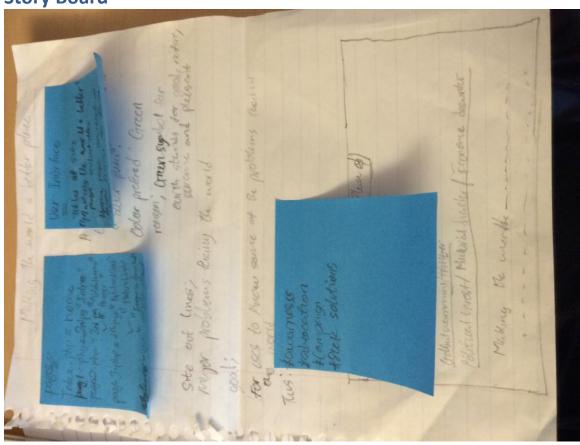

http://jigsaw.w3.org/css-validator/

# **Overall Description**

This is a continuation of assignment 1.1. This site will be about things we can all do to make the world a better place. I want to tell the visitor how climate change is affecting me and what we can do now to help the world.

### **Assignment requirements**

- 1. *Location* all files will be located in the www-root/cs008 folder of your uvm Silk account. The assignment web page and the submit process will detail the exact location. Failure to have your site located in the correct folder by the due dates will result in a zero on the assignment. Be sure to pay attention to the lowercase letters.
- 2. *Html Validation* All pages will pass W3C Html validation for html 5.
- 3. *Meta Information* All pages will contain a proper title tag, Meta tags (author, character set and description).
- 4. CSS Validation All pages will pass W3C 3.0 CSS validation.
- 5. CSS all pages will have a linked style sheet. I am not going to require a specific set of rules but you will be graded on your effort of what you try (just having my sample gets you a zero).
- 6. *Navigation* All pages will contain navigation to all other pages on the site using an ordered list. Be sure to enclose the navigation in the nav element with each menu item as a list item in one ordered list. There will 4 pages minimum, index.php plus one page for each item.
- 7. Content You will need to list three things that have climate change has had an impact on your life and what steps we can do to help improve the situation (one page for each item). Each page will have a minimum of 100 words not counting titles, lists or links. Be sure to use the correct elements to hold your content.
- 8. Array I want each of you to create an array of data and display it on the web page where it would make sense.

  CSV File take your array and put your array into a csv file. Add the code to Open, Read, Close and Display this data in a table element.
- 9. *Image* Include a picture on each page with fig and fig captions used.
- 10. *Types of images* Create each of these images on your site. Each image will be in the figure element with the figcaption element identifying the type of image as listed below (easier for the grader)
  - a. Animated image
  - b. Transparent image
  - c. Image map with a minimum of three links (these can be external)
- 11. *Browser compatibility* This site will be checked on Firefox, Safari, Chrome and Internet Explorer.
- 12. *File Names* the main home page will be called index.php with the rest of the file names up to you (be sure to use .php).
- 13. *Specification Document (this file)*: must be updated and saved as a specs.pdf (must use pdf format and correct filename in the same folder to be graded).
